# Hoffmann model of NFκB signaling highlights role of negative feedback

## The IκB–NF-κB Signaling Module: Temporal Control and Selective Gene Activation

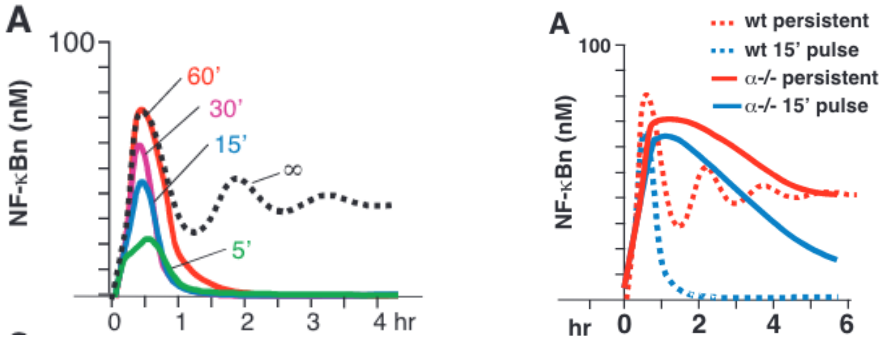

Alexander Hoffmann,[1]* Andre Levchenko,[2]* Martin L. Scott,[3]†
David Baltimore[1]‡

Simple differential equation model can account for responses seen in wide range of experiments

Model can identify different roles for IkB isoforms in transient behaviors

… and differential responses to sustained vs. pulsatile inputs
